More than just a Service Call.....

Quality and efficiency for the customer has always been Wallwin's number one priority. You can be assured that we will dispatch our experienced and reliable staff to your place of business or residence as quickly as possible. At Wallwin, our service rate includes far more than just an electrician. Included in every service call is the assistance of our full time service manager who coordinates every detail of the job from start to finish. Contacting local utilities, requesting required permits and inspections, ordering all the necessary materials, tracking the orders, ensuring that we meet or exceed promised results and time lines are just some of the "behind the scenes" services that the service manager is responsible for.

Our service electricians are the most highly qualified in the business with an average of 25 years of electrical experience. This experience guarantees that we will deliver the highest level of skill and know-how available in the industry.

Our large fleet of fully equipped service vehicles allows us the diverse capability to perform even the most difficult jobs on time, while meeting the highest possible standards of quality. With a bucket truck designed to reach 45' and several lifts, Wallwin is able to offer many additional services to our customers, making us the ONLY call that you need to make for projects or jobs of any scale. From small electrical issues to the maintenance and repair of parking lot or building lighting, we are prepared to take your call and respond efficiently.

Whether you require our services for your home or your business, we share the concern of making safety and productivity the number one priority every day. This concern is why Wallwin provides 24 hour emergency service, minimizing both costly downtime and hazardous conditions, restoring power or remedying other problems swiftly and efficiently.

Regardless of the nature of your service call, you can take comfort in the knowledge that every task will be handled with the highest possible level of professionalism. Always keep in mind that our service manager is available to assist you during normal business hours to answer any questions or concerns that you may have before, during or after any service issue.

President's Message

Freshness and new growth of spring, brings with it a great deal of promise for the future of the city of Barrie. The current "Barrie Means Business" campaign pledges to bring many new businesses and opportunities to Barrie and area. We are proud to have been a supportive and active member of the business and community sectors of Barrie for over 54 years.

Wallwin is a proud supporter of so many of Barrie's key community facilities, including Georgian College, Royal Victoria Hospital, the MacLaren Art Centre and the Barrie Community Sports Complex to name only a few. This spring also marks the beginning of the Royal Victoria Hospital's fundraising for a new cancer care facility. Wallwin will be a major supporter of this campaign. The RVH cancer care facility is desperately needed in our community, and I am hopeful that the residents of Barrie will lend their energies and financial support for this extremely worthwhile project.

In addition to the traditional forms of community support, we also believe strongly in supporting our local business community. We take pride in earning money locally and in turn, enlisting the products and services of local companies whenever possible. As residents and business owners in a great city like Barrie, the impressive efforts put forth, to support and utilize local businesses and services is an integral part of the strength and stability of our city. I hope that this prevailing trend both continues and expands as Barrie grows.

Craig Wallwin
President

Wallwin Voice & Data Networks Brings You The Power Of Convergence

Benefits As Real As The Technology

Businesses large and small are moving to IP Telephony because the benefits are tangible and immediate. A converged platform is easier and less expensive to manage than separate voice and data networks.

Nortel's Business Communications Manager is a converged communications system that delivers reliable and proven voice processing, feature-rich business telephony applications, and data networking services on a single platform.

Wallwin Voice & Data Networks would like to help you understand the possibilities of IP Telephony and present you with a custom solution - supported by Nortel's products and solutions - which will bring new power to the way you do business today and well into the future.

Transitioning To IP Telephony: Once, A Leap Of Faith..... Now, The Next Logical Step

With the right support, you can move to an IP Telephony solution with more confidence than you can imagine. Wallwin Voice & Data Networks can now bring you the power of converged voice and data networks. No matter the size of your business or your current equipment or network status, Wallwin can help you evaluate your current systems and plan a strategy for the future;

provide you with the end-to-end services you need to create, transition and operate your network; offer powerful combinations of revenue-enhancing applications, service and hardware, while ensuring a smooth migration to a

converged voice and data solution. Wallwin Voice & Data Networks, supported by Nortel, can revolutionize your business communications and usher you into an enhanced world of efficiency, productivity and profitability.

Feature Project *Emmanuel Baptist Church*

Construction is currently in progress on this one of a kind, modern day church. This state of the art facility will be complete with a gymnasium, classrooms and a daycare facility. Wallwin is extremely pleased to have been awarded this project in the Fall of 2004. The architect for this project is Ted Handy of Ted Handy & Associates in Barrie and the electrical engineering has been completed by Day & Behn Engineers. The project is being professionally overseen by Bertram Construction & Design out of Barrie, as the general contractor.

Wallwin is fortunate to have the experienced team of John Holloway as our project manager along with site foreman, Darren Anglis and lead hand, Mike Johnston ensuring the top quality and timely completion of this much anticipated project.
